

Flex AFE Cloud

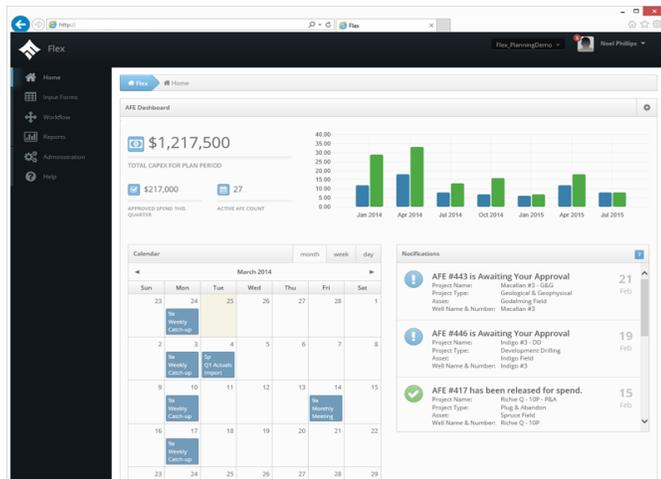

AFE TRACKER
Powered by FlexMI™

Track and control expenditures in the cloud.

Authorization for Expenditure Process Automation is Here.

Flex AFE Cloud is a secure hosted solution that provides a standard and consolidated approach to tracking and controlling expenditures.

Powering efficient growth

Today, small and midsize companies are able to access powerful capabilities that were once only available to large businesses. The cloud gives you access to the latest technology and innovation, quickly scaling up or down as business needs change, dramatically increasing business performance so you can process expenditures faster.

Technology that helps you do more with less starting at \$49/month.

Automate workflows with real-time email notifications

Increase visibility into project status with detailed audit trail

Easily track cost against budget

Generate accurate reports and performance measurements

Altius offers a flexible and powerful cloud-based product for tracking and approving expenditures, designed for business users. The software requires little to no training and can be managed without engaging IT resources, so change doesn't have to come with a lot of training costs or related business disruptions. The technology utilizes Microsoft business applications that enable you to adapt and scale with less hassle, avoid up-front capital expenses, and get the tools you need to be up and running quickly.

Improving AFE Process Efficiency

Web-based

Bring the AFE Process online and have secure access from anywhere via the internet.

Electronic Workflow Automation

Standardize the AFE business process with a defined electronic workflow that supports the entire expenditure lifecycle, from creation to close.

Status and Activity Monitoring

Gain a dashboard view of your AFE's status in the approval process. Drill down into individual AFEs for a time stamped audit trail of business decisions and workflow interactions.

Collaboration

Route and approve AFEs across departments with real-time email notifications on your mobile device or tablet.

AFE Search

Quickly locate any AFE by using the search tool bar.

Document Repository

Built in document repository to attach any type of document to the AFE (e.g. .doc, .exe, .pdf)

Reporting and Analysis

Users can quickly and easily drill down into a multi-dimensional view of the data. Ad-hoc reports can be created in minutes.

Security

Role based restrictions are applied to users as determined and managed by the system administrator.

"We have developed an affordable solution that includes a digitized AFE template for capturing data, a defined workflow and simple reporting to automate the creation, tracking and approval of AFEs."

– Michael Welch, Senior Solutions Architect
