

DATA SHEET

Streamline the Authorization for Expenditure Process with Flex AFE Tracker™

Alleviate the manual, antiquated paper process for tracking and approving capital expenditure. Speed approval times, automate workflows, integrate data from other systems, and create custom reports at the business level. Gain deeper insight into capital spend for better decision making.

STREAMLINE WORKFLOW

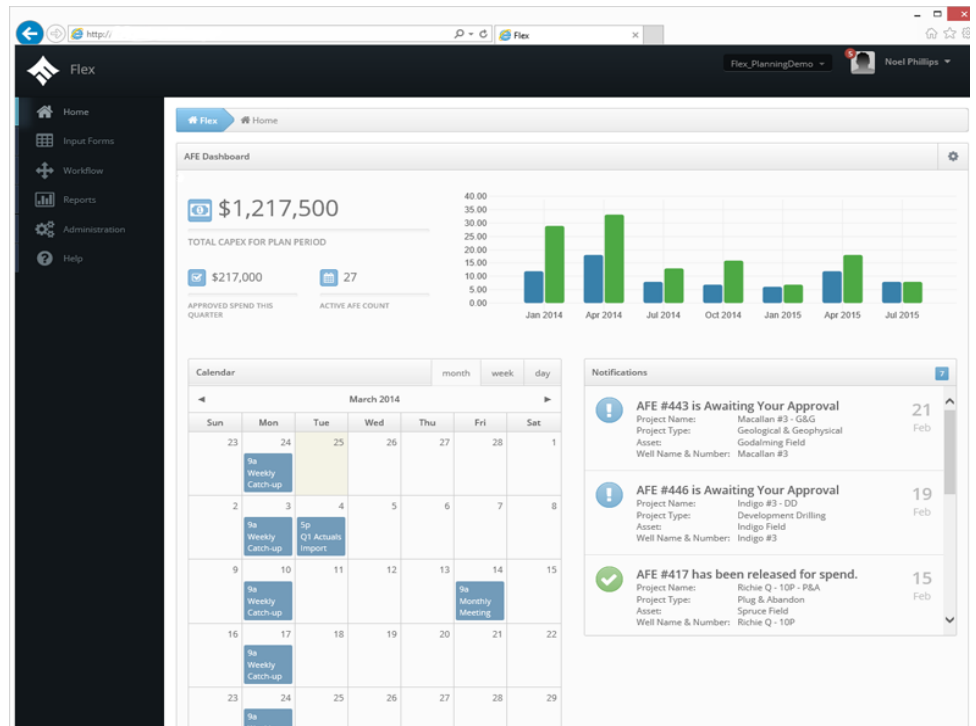

- Fully configurable to your unique business process.

IMPROVE ACCURACY

- Minimize human error and ensure complete, accurate information.

INCREASE EFFICIENCY

- Shorten the process of reviewing, approving and signing AFEs.

FEATURES

Ease of Use

Leverage tools and technologies users are familiar with, ensuring ease of use and adoption.

Status and Activity Monitoring

The portfolio page provides a dashboard view of each AFE's status in the approval process. Drill down into individual AFEs to view a time stamped audit trail of all business decisions and workflow interactions. Flexible search and filter capabilities allow users as broad or narrow of a view as needed.

External Data Integration

Capability to integrate with external databases and business application technologies, including accounting software, well systems, and ERP systems.

Document Repository

The built-in document repository allows users to attach any type of document to the AFE (e.g. .doc, .exe, .pdf).

Partner Communications

Facilitate partner relationships through automated email notifications, ownership tracking, and compliance monitoring.

Workflow Configuration

The solution is designed to fit your unique workflow, mirroring the AFE business process from the field to the boardroom.

Electronic Workflow Automation

The corporate review and approval process is optimized with real-time email notifications for rapid approval rates.

Ad-hoc Reporting

Utilizing Microsoft SQL Server Analysis Services, users can quickly and easily drill down into a multi-dimensional view of the data. Custom reports based on business requirements can be created by end-users in minutes.

Security

Role based restrictions are applied to users as determined and managed by the system administrator.

Scalable for Future Growth

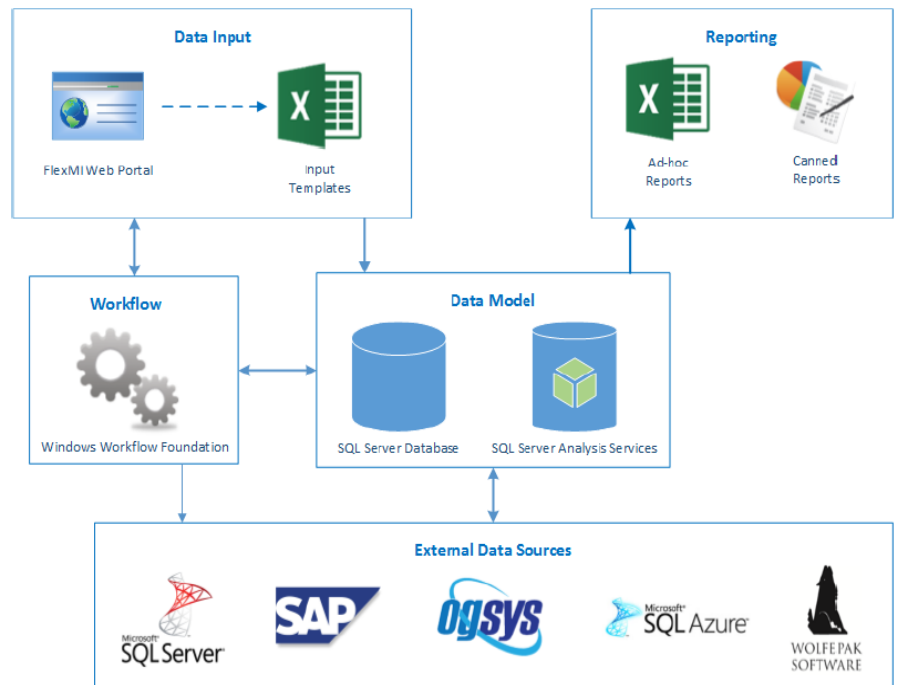

The subscription based pricing model allows for new users to be added at any time.

“The solution transformed an antiquated inefficient paper process, streamlined it, and created a robust, user-friendly system that delivers accurate AFEs in a timely manner.

AFE Tracker has shortened the process of reviewing, approving and signing AFEs by more than half.”

-IT Manager, Oil & Gas Major

ARCHITECTURE

SOFTWARE AND HARDWARE REQUIREMENTS

Hosting

- Windows Server 2008 (R2)
- Microsoft SQL Server 2008 (R2)
